

<b>Management Plan Bojana-Buna Region</b>
<p><b>Point Of Contact:</b>  Dr. Martin Schneider-Jacoby, Annette Spangenberg; European Nature Heritage Fund  martin.schneider-jacoby@euronatur.org, annette.spangenberg@euronatur.org</p>
<p><b>Rationale:</b>  Management Plan for Bojana-Buna region in the border region of Montenegro and Albania; Detail of Velika Plaza area (13 km strip in Montenegro part)  Basics: Mapping of natural situation (rivers, channels, habitats) and man-made features (streets, settlements)  Scenario: Definition of protected areas (using IUCN criteria), areas of special management and potential flood zones</p>
<p><b>Aims:</b>  Basic information for further spatial planning in the region as well as for tourist information and development</p>
<p><b>Addressed users:</b>  Ministry of Environment of Montenegro, Centre for Spatial Planning, Coastal Zone Management  Usage for future spatial planning and for backing up protection concepts</p>
<p><b>Geographic Area:</b>  Montenegro, estuary of Bojana River (bordering Albania)</p>
<p><b>Data, Feature Types and web services:</b>  ArcView shapes and databases, tif data</p>
<p><b>Architecture:</b>  &lt;A sketch with the architecture: the different elements of the Nature-GIS SDI that are involved&gt;</p>
<p><b>Screenshots:</b>  &lt;Some screenshots of the web application and/or the data&gt;</p>
<p><b>Functions:</b>  Mainly viewing</p>
<p><b>URLs:</b>  <b>Web services:</b>  &lt;provide URL's of the web services here, when publicly available&gt;  <b>Web application:</b>  &lt;provide URL of the web application and/or to a screencam on the web with a demonstration&gt;&gt;</p>

**Problems:**

<description of the difficulties encountered (and possibly how they were solved) >

**Recommendations:**

<with the experience you gained in deploying your interoperable web services, provide recommendations to other potential members of the Nature-GIS network>
